HR Analytics Report Attrition

Data-Driven Insights for Workforce
Management

Presented by **ANKIT RAJ**

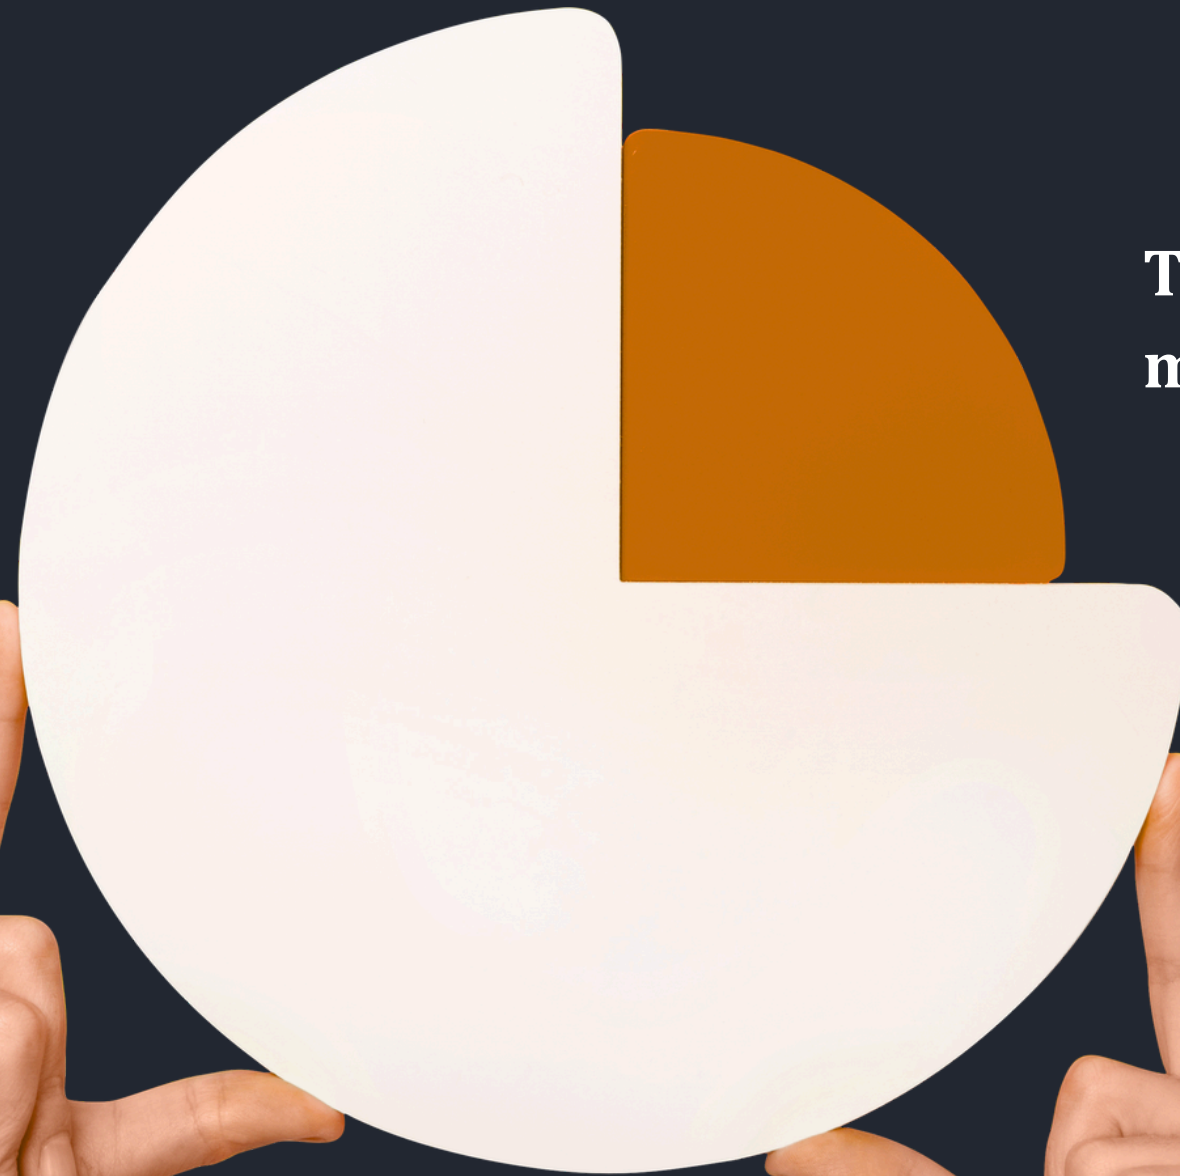

Background

NovaTech Solutions is a fictional multinational technology and consulting company that provides software development, cloud services, and data analytics solutions to clients across various industries. The company has over 5,000 employees working across departments such as IT, Sales, Finance, Marketing, HR, Operations, and Customer Support.

In today's competitive market, companies invest heavily in hiring, onboarding, training, and employee development. However, when employees leave frequently, organizations lose both money and valuable talent.

The company is experiencing high employee attrition, but management does not clearly understand:

- ➔ Which employees are most likely to leave
- ➔ The major reasons behind attrition
- ➔ Which departments are facing the highest turnover
- ➔ Whether salary, stress, overtime, or management issues are affecting retention

Why It Needs to Be Solved

ANKIT RAJ MISHRA

SUBSCRIBE

Employee attrition directly impacts business performance.

If companies fail to address attrition:

Hiring costs increase

Experienced employees

Team productivity decreases

Customer satisfaction gets affected

Business growth slows down

Stakeholders
